

STRATEGIZING

PURPOSE OF DISCUSSION

The purpose of this discussion is to think about how the actions that you have designed could be bundled together into coherent strategies. The question below lists some important issues to consider.

DISCUSSION QUESTIONS

- What would be a useful way of grouping the actions that you have identified? Strategies could for example be formulated along program lines, or funding priorities, but it could also be related to geographic areas, to the scales that you need to operate at, or to the type of leverage point that you are targeting.
- What minimum set of combined actions would move you towards your goal? You shouldn't implement any unnecessary actions, so try to identify the most effective combinations of actions that will do the job.
- For actions that depend on each other, how should they be sequenced, and coordinated across sectors and scales, in order for implementation to work?
